Housing System for Lighting

Change more

than just the light.

It is amazing how lighting can change the whole atmosphere in a room.

With *Livin*LIGHT from Ultraframe there is no restriction to the style of light that can be fitted in your conservatory, Loggia or glass extension. *Livin*LIGHT boasts a patented configurable, insulated electrical housing system for easy installation and an enhanced lighting style. It will also improve heat retention in the Winter!

LivinLIGHT
by ultraframe

Breathe life into your conservatory or glazed extension with the LivingLIGHT from Ultraframe

Lighting doesn't just enhance a room; it can redefine the look and feel of your entire interior design. A well lit room helps you do all the things you love, whether it's reading a book or setting the mood for relaxation or a family get together.

LivingLIGHT adds an insulated electrical housing system to the centre ridge under-cladding of a glazed roof (or where the roof meets the house wall on a Lean-to style conservatory or extension). This enables you to install lights in places where you otherwise wouldn't be able to; giving your glazed extension a more 'roomlike' feel.

Furthermore, the LivingLIGHT addresses one of the main heat loss areas in a glazed extension, helping your room to remain warm and more thermally efficient.

LivingLIGHT can incorporate many different types of lighting from spots and rail lights to pendants or chandeliers.

Bring the Room to life by painting the LivingLIGHT to match your décor and furniture or leave it white to emulate a ceiling. Paint the LivingLIGHT a neutral colour for a relaxing ambiance or make a statement using a bold colour and contemporary lighting... the choice is yours!
